

# Let variety grow together!

## Be a tomato-ambassador!

Are you in the mood for gardening? You are open minded, want to discover new things, retain old variety and exchange yourself with others?

Preserve biological diversity, taste the difference and discover your neighbourhood.  
All you need is a balcony, garden or window sill.

Contact us until February 21st 2020 and we will provide special tomato seeds for you – to recultivate and share.
